

Chaux AIMOS

Hydrated Lime CL 90-S

CHAUX AIMOS is an old lime putty (minimum one year old), in line with the European Standard for building lime (EN 459-1).

Properties

Hydrated limes have many specific features:

- They are fine and have superior creaminess
- Very white
- Air setting is spread over time, allowing multiple finishes
- Advance preparation of mortars or limewashes (no time limit for application in good storage conditions)

Uses

Finishing plasters

- Thin decorative plasters
- Paintings
- Marmorinos

Packaging

21-kg buckets. Pallets of 48 buckets (1008 kg)

Shelf life

No limit if stored in water

la
**Chaux
Socli**
Matière & Sens

Advantages

- 100% Natural
- Extra white
- Allows many finish
- Unlimited shelf life

Application advice

- Prepare the required quantity for a wall or an entire room at the same time and in advance
- Combined with marble powder and talco, our lime putty enables painting
- Never work during periods of frost or on frozen substrates, and protect them from the sun and wind
- Always remove the surplus mortar at the feet of walls before setting begins
- Prepare the required quantity of mortar or paint at the same time and in advance

Performance chart

	Chemical and mechanical characteristics*
CaO	95.9%
MgO	<0.1%
CO ²	<0.1%
Stability	Correct
Free lime content	61%

Directions for use

- Hydrated lime setting takes time, so plaster application during winter may be dangerous. Hydrated lime will be completely set after 8-9 months. Spring is the best season for application (water contained in the mortars cannot freeze)
- Do not carry out reinforced concrete or masonry works
- Do not apply on substrates with saltpeter

Supports not allowed

Do not make reinforced concrete
Do not apply to substrates
containing plaster or saltpeter
