

TONACHINO DI SAN TOMMASO

Thin Coat

TONACHINO DI SAN TOMMASO is a ready to use natural, white, hydrated lime-based mortar. It is applied manually on inside and outside walls.

Properties

- Ready to use without any adjunction of water or additives
- Can be used as a finishing plaster and a preparation plaster for paint or marmorino as well
- Very good covering capacity
- Natural white due to the fine marble powder
- Good bonding
- Very suitable for humid spaces sets directly on all lime or lime and cement substrates. For other walls, it requires application of PRIMER SAN TOMMASO
- Only two coats should be applied
- Enables a wider range of finishing aspects (smooth, mopped, structured, etc.) It can also be used as preparation for a marmorino or a lime paint

Consumption

- Smooth: 2.5 to 3.5 kg/m² for a finish
- Rough substrate: 2.5 to 3.5 kg/m² and by layer
- Floated with sponge: 3 to 4 kg/m² for the entire work

Components

- Lime putty, marble, bentonite, silica sand, mica, egg, milk and less than 1% artificial additives

Pigments

- SOCLI's sparkling pigments
- Natural and synthetic pigments

Contraindications

- Do not dilute
