

VELATURA

Lime patina

Real patina made in the traditional way, semi-transparent, ready to use, natural, VELATURA is designed for internal and external wall surfaces.

Properties

- Semi-transparent traditional lime patina
- It can be applied to all lime (paint and lime render), plaster or porous paint substrates
- It can be coloured with pigments that are compatible with lime to obtain sustained and very bright colours. A wide range of 320 colours guarantees a precise colour
- Very suitable for wet environments
- Can make a real, old style patina with a spalter, brush or sponge
- Easy pigment dilution

Consumption

- 10 to 20 m²/L and by layer, depending on the background

Components

- Fat lime water, milk, methylcellulose, bentonite, vinegar, acrylic resin (<3%), essential oils, formaldehyde-free bactericide

Pigments

- SOCLI's sparkling pigments
- Natural and synthetic pigments

Contraindications

- Do not work directly on a non-porous substrate
- Do not apply outside of 10°C to 30°C
- Do not expose to rain or cold the day after application (always protect the substrate)
